## Maintain your distance with **VOX Radioguides®**

The VOX Radioguide® system consists of a transmitter and microphone for the speaker and a receiver and earpiece for the listener, useful for

- Communicating to listeners spread out over large spaces;
- Activities in noisy environments or sites where silence is desirable or enforced;
- Internal spaces where acoustics are unsuited to PA systems;
- Conferences and meetings involving simultaneous translations;
- Situations where communication is hampered by poor line of sight, such as narrow passageways, spaces blocked by columns and other objects, hiking in a forest, or even while cycling together;
- Management of groups in crowded environments;
- Communication between separate rooms, vehicles, or over distance.

**The VOX Radioguide®** system is already well-known and in frequent use in many countries around the world and by many organisations since its introduction in 2001.

VOX has representative offices and distribution centres in

- |                  |                   |
|------------------|-------------------|
| • Canada         | • Armenia         |
| • Egypt          | • The Netherlands |
| • Vatican City   | • Ireland         |
| • South Africa   | • Hong Kong SAR   |
| • United Kingdom | • Russia          |
| • Portugal       | • Israel          |
| • USA            | • Finland         |
| • Turkey         | • Spain           |
| • Switzerland    | • Mexico          |
| • Indonesia      | • Thailand        |

The VOX Radioguide® system has been in use in Singapore since 2015 providing unparalleled service for

- Singapore Tourism Board
- Government outreach programmes
- Various other Government Ministries and Statutory Boards
- National Heritage Festival
- Schools and universities
- Friends of the Museum
- Society of Tourist Guides, Singapore
- Heritage associations
- Community clubs
- Embassies and expat associations
- Churches and temples
- Events and conferences
- Corporate training
- Factory/site visits
- Tourist attractions

## The advantages of using **VOX Radioguides®**

### **For guides, docents, and speakers**

- Significantly reduces voice strain when speaking in noisy environments
- No more shouting: nuanced commentary in a natural tone of voice
- Minimises disturbance when used within sensitive environments
- Eliminates the problem of hangers-on
- Helps keep the group together, whatever the size, yet maintain distance from another
- Flexible communication e.g. commentary while walking, or from a remote location
- Operates on bikes, between vehicles and boats, from one room to another, or even between pods on the Singapore Flyer

### **For the people listening to you**

- Hear every wonderful word you say in both noisy as well as extremely quiet environments
- Listen to your commentary even they stop to take photographs
- No more time wasted waiting for everyone to gather around before commentary begins
- Improve communication for listeners with hearing impairment
- Possibility of re-joining if a group member accidentally loses visual contact with group during outdoor activities

### **For tour operators and event organisers**

- Immense added value – distinguish your service from your competitors
- Greatly improved client satisfaction
- Only paid clients will benefit your guide's commentary
- Proven international system
